

CHALET WILDLIFE MANAGEMENT AREA
(Dalton, Windsor, & Cheshire)

- Size: 6437 acres. Elevations range from 995 feet along Rte. 8 in Cheshire to 2265 feet atop Weston Mountain.
- Access: Three parking lots available off Flintstone Road, Windsor and Rte 8 and Notch Road in Cheshire. The Appalachian Trail corridor divides the area roughly in half.
- Vegetation: Northern hardwoods primarily of maples, birches, white ash, black cherry and American beech comprise most of the forest. Hemlock grows along moist, shaded slopes and stream channels. Red spruce and balsam fir are found at higher elevations especially near beaver ponds and meadows.
- Water: Anthony, Collins, Gore, South and Weston Brooks plus several un-named streams flow from the area. Anthony Pond (4± acres) is the only waterbody found here.
- Wildlife: Deer, ruffed grouse, snowshoe hares, bears, bobcats, fishers, beavers and moose inhabit the area. Small brook trout inhabit the streams.
- Special Regulations:
