

Mahanna Cobble

Conserved only by the toughest of fights in court, this summit at the north end of Lenox Mountain is not only beautiful, but the most appropriate place possible to acknowledge the enduring gifts of Berkshire Natural Resource's founder, George Wislocki.

Directions: The trail begins at Bosquet Ski Area. (101 Dan Fox Dr, Pittsfield, MA 01201)
GPS: 42.4195, -73.2766 (Trailhead parking)

The Mahanna Cobble Reserve is owned and cared for by the Berkshire Natural Resources Council. BNRC is grateful to Mill Town and Bousquet for providing the trailhead access to the Reserve. Help keep the access open by respecting the property and following the guidance provided. Please refrain from bringing dogs on Bousquet property in ski season.

MAHANNA COBBLE TRAIL MAP

Trail Description:

Trail: 3.2 miles, out-and-back

Difficulty: Difficult

(strenuous due to elevation changes)

The first section of the trail follows a 0.6-mile route on Bousquet property. Hikers start at the top of **Tube Town** and look across the slope for a hiker sign. Cross the ski slope at the narrowest location. You will ascend the **Russell ski trail**, which is ACTIVE in winter; hug the edge of the tree line on the left side while heading up slope. Follow posts with blue blazes along the way, soon they will lead you to a trail through the woods toward the **Drifter ski trail**. Continue to follow blue blazes and then cross Drifter, another ACTIVE ski trail in winter. PROCEED WITH CAUTION at all ski trail crossings, and follow blue blazes to the woodland start of the trail and informational kiosk. From there, the Mahanna Cobble single-track trail is 1 mile with switch-back turns and stone steps. There is a spectacular view and stone bench at the vista. The bench is dedicated to founding BNRC Executive Director, George Wislocki. Mahanna Cobble provides a key link in the **Yokun Ridge High Road route**. The High Road is a long-term initiative of BNRC to make connections from towns to trails. For more information visit bnrc.org/the-high-road.

Natural History:

The Cobble itself is the northern summit of Lenox Mountain, the long and picturesque ridge that extends north from Olivia's Overlook to the Bousquet Ski Area in Pittsfield. "Cobbles" are a particular Berkshire name for a classic geologic formation of exposed bedrock existing high on a ridge, evidence of tectonic movement that shifted ancient strata.
